PAT. NO.	Title
-------------	-------

- 1 6,740,521 **T** High-sensitive detection of environmental pollutants
- 2 6,562,420 **T** Liquid crystal aligning film
- 3 6,541,185 **T** Micropattern polarized element
- 4 6,498,279 **T** Ultrastable zeolite Y-containing hydrogenation catalyst and process for hydrogenating aromatic and/or heterocyclic aromatic compound-containing feed
- 5 6,355,365 **T** Molecular compound, luminous material using the same, and luminous element
- 6 5,753,692 **T** Medicinal thiophene compounds
- 7 5,747,525 **T** Medicinal thiophene compounds
- 8 5,650,132 **T** Process for producing hydrogen from hydrocarbon
- 9 5,602,170 **T** Medicinal thiophene compounds
- 10 5,576,417 **T** Method for synthesizing aromatic polymers
- 11 5,557,022 **T** Aromatization process
- 12 5,135,673 **T** Organic ferromagnetic substance
- 13 5,034,614 **T** Method of improving fluorescence yield
- 14 4,502,930 **T** Method for manufacture of 7-substituted quadricyclene-cyclodextrin inclusion compound
